Profile

I was born and raised in Van on April 28, 2001. I attended Kasimoglu school for my primary and secondary education. I completed my high school education at Özen Adalı Anatolian High School. Having succeeded well in the university exam, I also won a department that I love and want, Firat University Software Engineering. I like my department very much because of my interest in computers and also the working logic of applications. I have improved myself by gaining many certificates, training and activities and continuing to improve myself in better places.

Education

Anatolian High School

Sep 2015 - June 2019

Özen Adalı Anatolia High School

I completed my high school education between these years.

University

Sep 2020 - June 2024

Firat University

I am in a section that I love and want. I'm about to leave 3 years of my 4 year period behind.

Publications

Publications

I have developed many small or medium projects and learned new technologies with these projects. You can find them on Github, which I mentioned above. 🔗

Github
