## ABOUT ME

As a recent graduate in software engineering, I have gained practical experience through a five-month placement and a three-month internship, thereby developing a robust foundation in Java and C# with a particular focus on object-oriented programming. My personal projects in React, NodeJS, MongoDB, and Python have served to deepen my passion for software development. Currently, I am expanding my expertise in Kotlin and .NET Core. I am a proactive learner, driven by a collaborative and solution-focused approach, and I am eager to contribute to your team.
